Energy Efficiencies Solutions helps working mom to save energy - and health

"I am so grateful that EES was able to help my family. My home is safer and more comfortable. We are now saving over \$300 a year on our energy bills. This was important to me as a single mother of two wonderful girls. I was able to use these savings to help pay for my daughter's college books.

Justin and Angel were so knowledgeable, and thankfully they located a large gas leak at my home. They were able to have the gas leaked fixed right away. The office staff, Rebecca and Xavier, were so kind and helped me understand the process from start to finish.

I recommend this service to everyone. It was such a help to my family. It was relief to have lower bills, and thank God they located that gas leak in my home. I have referred all my friends and family.

I only wish I had known about the service sooner, so I could have started saving years ago. I hope other communities and families take advantage of the EES team and the wonderful services offered through their company."
