Recommendations.

Many homes can benefit from air sealing to improve comfort and energy savings by sealing common sources of air leaks and drafts, which can add up to 20% of your home's heating and cooling costs. It is our goal to identify sources of air movement and heat loss and treat them through targeted air sealing and insulation during your installation. Duct sealing and insulation may also be recommended depending on your home's needs. Throughout this process, we strive for accuracy but know that site conditions may result in changes to proposed improvements.

Based on the Virtual Pre-Assessment, we are excited to schedule a walk-through to confirm the following improvement opportunities:

[FILL OUT APPLICABLE RECOMMENDATIONS]

Recommended Improvements
AIR SEALING & DUCT SEALING
[Blower door guided air sealing]
INSULATION
[Attic floor – 8" Loose blown cellulose]
HVAC AND APPLIANCE UPGRADES
[Furnace replacement]
[Dehumidifier replacement]

Financing options.

Eversource offers low-cost financing solutions help you make energy improvements that lower your energy bills and improve the comfort and safety of your home.

As with any building improvement project, Eversource recommends shopping around and seeking as much information as possible. Neither Eversource nor any of its partners endorse, guarantee, represent, or assume liability for any loan product proposed or carried out by any entity listed.
